MAJACRAFT

Spinning wheels

- are designed to help you be a successful spinner and enjoy your hobby more
- have been developed in consultation with experienced spinners to incorporate special features:
 - ✓ you don't have to oil your wheel, or worry about the mess - all of our wheels use modern ball bearings
 - ✓ you'll find it easier to spin more even yarn, because of the smoother pedalling action made possible by our heel and toe pedals
 - ✓ you don't need to adjust the belt tension - our stretchy co-polymer drive band does this for you
 - ✓ you can spin a wide range of fibres - our multiple ratio system (from 4:1 to 14:1) makes this possible
 - ✓ you will be able to spin for longer periods of time; without ankle fatigue, because of the way that our foot pedals are carefully angled to suit the human body
 - ✓ you won't need to fiddle with threading hooks - our wheels have a large delta orifice
 - ✓ you won't need to change bobbins so often, because of our large capacity bobbins - three are supplied with each wheel
 - ✓ you will avoid the frustration of the teething troubles of a kitset wheel. Every wheel we make is tried and tested.
 - ✓ you will enjoy the beautiful and durable qualities of our natural solid timber construction - your wheel will be a cherished piece of furniture in its own right
 - ✓ if you are afflicted by arthritis or are physically disabled, please telephone or write to us about our special wheels for the disabled
 - ✓ do you live overseas? - we are happy to export

Superbly hand - crafted
spinning wheels
for everyone

- experienced spinners
- beginners
- teachers
- students
- disabled spinners

solid timber construction.
Many special features
to make your hobby easier
and more enjoyable.
