

THE "MITZI" SCANDINAVIAN TYPE SPINNING WHEEL

The "MITZI" wheel, as its original is designed to give a lifetime of relaxed and faultless spinning. Its low slung stability and the large diameter wheel gives this wheel the ultimate of spinning bliss.

The "MITZI" is equally at home with the double snare or the Scotch tensioning method and as with all our wheels, it has a 10mm flyer orifice, a three speed whorl, four bobbins, a "lazy kate" threading hook and also a larger two speed whorl. A Jumbo spinning attachment can be fitted also.

The professional polish, elegant lines and a little carving on the foot pedal gives the "MITZI" an immensely pleasing appearance.

The "MITZI" has been assembled and test spun before packing, the thread on the flyer bobbin is produced on this wheel. It is packed in a strong cardboard container and comes in a knocked-down version. The tightening of four nuts and three wood screws complete the wheel.

Size: Height: 90cm (35") Length: 90cm (35")
Width: 30cm (12") Weight: 12kg (25lb)
Wheel to whorl ratios are: 17-12-8½-7½-4 to 1.
