

that hours of spinning can be done without ankle fatigue. Its compact design and beautiful proportions make it ideal for "Spinning Circles" where many people meet to spin and talk in one room.

TO REPLACE BOBBINS turn catch in clockwise direction, remove driving band from Bobbin and Pulley and lift out of brass arms. Pull the Pulley off splined shaft, remove bobbin and replace in the reverse order. (Should the Pulley prove stiff to move when new, place the small bearing knob on a block of wood and press the bobbin hard with your two thumbs, this should force the pulley to move).
